<b>Technology Utilized:</b>	<b>Landfill Construction</b>

### **Project Description**

SEMS was contracted by the West Carroll Parish Police Jury to construct a new landfill cell at the Parish facility. The new cell measured approximately 6 acres. The work included:

- C Subgrade preparation with multi-angle sloping,
- C Fill placement in 8" lifts with compaction,
- C Construction of containment berms around the entire cell,
- C Installation of a synthetic liner,
- C Installation of a liner protection layer,
- C Tie- ins to the existing cell berms and cover layer, and
- C Surveying and compaction testing.

Although the work was completed during the winter and encountered significant rain and snow events, the project was completed on time and within budget.
