Project Description

In 1993, SEMS, Inc. was contracted by MAPCO Inc. (MAPCO) to perform general consulting and remediation services. The following is a brief description of services performed by SEMS:

- C **Underground Storage Tank Program** - SEMS has performed the necessary activities to ensure compliance with state and federal regulations. Activities performed by SEMS for MAPCO include Site Assessments, Corrective Action Plans, Installation of Remedial Systems, Operation and Maintenance of Remedial Systems, and Quarterly Monitoring, Sampling and Reporting.

- C **Oil/Water Separator Program** - SEMS is managing an oil/water separator program for MAPCO which includes a 12 state area with approximately 40 sites. Activities being performed by SEMS include monthly monitoring and sampling, operation and maintenance activities, repairs, permitting, and preparation of discharge monitoring reports.

- C **Emergency Response Program** - SEMS is managing an national emergency response program for MAPCO. As spills occur, SEMS is contacted to coordinate response and reporting activities. SEMS has a network of spill response companies across the country to allow for a maximum two hour response time. SEMS contacts appropriate regulatory personnel and prepares written reports, as required.
