

Project Name:	MI, L.L.C. -Louisiana Facilities
Project Location:	Louisiana
Completion Date:	Ongoing
Project Duration:	Ongoing
Project Value:	\$12,000
Client Name:	MI, L.L.C.
Client Contact:	Mr. Bryan Benoit
Client Phone Number:	337-233-1714
Technology Utilized:	Federal and State Regulatory Environmental Management

Project Description

SEMS, Inc. was contracted to perform a review of eleven facility Spill Prevention Control and Countermeasure Plans (SPCC). The review involves visiting their drilling fluid production, storage, and transportation facilities throughout southern Louisiana and amending their SPCC plans to include the latest revisions to the federal regulatory code 40 CFR Part 112. The most notable change to the facility SPCC requirements involve the testing of tanks to applicable industry standards and the establishment of a tank testing program/procedures. A Professional Engineer (PE) or his authorized representative visited the facilities, the SPCC plans were amended to include the new federal requirements, and a PE certified the SPCC plans. The PE certification attested that the plans have been prepared in accordance with good engineering practices, including consideration of applicable industry standards.
